

BeRiverFriendly Winter Walk BINGO

Earth Worm	Storm Drain Inlet	Trees/ Oak Tree	Litter (Yuck!)
Animal Tracks	Wildflower	Dirt/Gravel Path	Animal Tracks
Flowing Water	Duck or Bird	Pet Waste Station	Storm Drain Marker
Frogs	Trash Can	Illegal Dumping	Weeds

Pet Waste Station	Animal Tracks	Earth Worm	Trees/ Oak Tree
Flowing Water	Wildflower	Bug	Illegal Dumping
Stormwater Drain Inlet	Trash Can	Leaves	Dirt/Gravel Path
Litter (Yuck!)	Frogs	Weeds	Duck or Bird

How to play: Screenshot, print or play on a device (2 cards to choose from), and take a photo of your findings while you walk or hike. Once you've taken four pictures of items on your card that line up in a row, send us a DM on Facebook @**SacramentoStormwaterQualityPartnership** with your pictures and winning card to win a prize.

Be River-Friendly...

Keep Our Waterways Clean!

Earth worm:

Earth worms are great helpers in the garden! They can make soil healthy which is important for plants.

<p>Frog: Frogs are very sensitive to pollution around them including weed killers, fertilizers, pesticides, and detergents. What are some steps you can take to protect their habitat?</p>	<p>Storm Drain Inlets: Trash and other debris on the road can be washed into a storm drain inlet by rain/outdoor water, which drains into a creek or river. Let's keep pollutants out of our waterways!</p>	<p>Trees/Oak Tree: Trees do a good job of cleaning our water! They filter water as it passes through the roots and ground water.</p>	<p>Litter: Litter/trash is one of the top pollutants that end up in our creeks and rivers. Remember to toss your waste in the trash to keep Sacramento's creeks and rivers clean!</p>
<p>Animal Tracks: Our community has a great diversity of wildlife that live and depend on healthy waterways. Help protect their homes by keeping our waterways clean!</p>	<p>Wildflower: We have many beautiful plants that are native to California. Did you know that several native plants are drought resistant or can survive with little water? Can you name a few native plants?</p>	<p>Dirt/Gravel Paths: Unlike concrete and asphalt, gravel or dirt soak up rain water, which keeps polluted water from reaching our waterways.</p>	<p>Flowing water: Water is all around us! Be a good steward by taking actions that keep our waterways clean!</p>
<p>Duck or Bird: These critters are affected by unhealthy creeks and rivers. What is one positive action you can take to protect their environment?</p>	<p>Pet Waste Station: A pet waste station at a park or trail is a great place to dispose of dog poop. Scoop the poop, bag it up and toss it in the trash can!</p>	<p>Storm Drain Marker: A storm drain marking with a "No Dumping" message is a reminder to keep our waterways clean!</p>	<p>Trash Can: Remember to trash your trash! Clean rivers start with clean streets!</p>
<p>Illegal Dumping: Illegal dumping is bad for our environment and can be very costly to clean up. Let's keep our communities clean!</p>	<p>Weeds: Did you know that using a 3 inch layer of mulch in your landscape can reduce weeds by up to 90%?</p>	<p>Leaves: Did you know that leaves and other plant material can be used to make mulch which reduces weeds and builds healthy soil?</p>	<p>Bugs: All bugs aren't bad! Lady bugs, dragonflies, green lacewings are good helpers because they feed on pests in the garden.</p>
